OBJECTIVE

Ambitious web developer with a focus on MERN stack technologies, aspiring to create impactful and user-focused applications. I have hands-on experience on Frappe framework and Android development using Java too. Willing to learn any new stack as per the requirement. Enthusiastic about exploring AWS and Web3 in future.

EXPERIENCE

Frappe Developer Intern at PPCRC,2024

Sept 2024 - Dec 2024

- I mainly worked on Hostel Management and Infrastructure- Institute ERP. My main task was to develop customized ERP modules for college and hostel management using the Frappe framework.
- Implemented dynamic dashboards, reports and scripts to enhance user functionality and experience.

PROJECTS

PriceMint - Track. Analyze. Stay Ahead. (<https://price-mint.vercel.app/>)

- All-in-one platform to track real-time cryptocurrency prices, trends, and market data with clarity and ease.
- I have used React to create a dynamic website, that helps enthusiasts, traders, and long-term investors monitor market performance, understand patterns, and make smarter decisions

Katta - Realtime Chat app using MERN stack (<https://katta.onrender.com>)

- To build real-time chat app, I have used MERN stack, along with socket.io for bidirectional real-time messaging and JWT for authentication. I have deployed it.
- Key features include, real time messaging, user authentication and authorization, online user status, error handling and security, etc.

Civica - Because law shouldn't be a mystery

- Civica is a legal tech platform focused on simplifying Indian civil law by offering accessible tools like legal chatbots and a easy way to learn Indian laws efficiently.
- It empowers users to understand their rights and create legally sound documents without needing a lawyer, using plain language and automated guidance.

Trending Places App using Flutter

- Created a trending places app using flutter. User will be able to explore popular places and know their information about it.
- It shows trending places and hidden gems to travel. The app was created using Flutter.

EDUCATION

2022 - 2026

International Institute of Information Technology

B.E. in Computer Engineering
